

**GÉANT**

connect • communicate • collaborate

By providing the network communications infrastructure, GÉANT enables collaboration between doctors and medical researchers that underpins drug discovery and breakthrough medical treatment.

# Accelerating medical research

GÉANT is the high-performance pan-European communications infrastructure dedicated to the research and education community. Together with Europe's national research networks, GÉANT connects 40 million users in over 8,000 institutions across 40 countries.
