

## GÉANT Open Call

### **GÉANT-TrustBroker- New Federation Services and Protocols for Dynamically Building Trust in the R&E Community**

<http://www.geant.net/opencall/Authentication/Pages/TrustBroker.aspx>

Participants: Bavarian Academy of Sciences and Humanities - Leibniz Supercomputing Centre

#### **Biographies**

Wolfgang Hommel is a research group leader at the Leibniz Supercomputing Centre (LRZ) in Munich, Germany. He has worked on identity management and federation architectures in theory and practice for more than a decade. His research focuses on information security in complex large-scale and inter-organizational scenarios.

Stefan Metzger has a university diploma degree in computer science from Technische Universität München and worked in industry on risk and compliance management projects before he joined LRZ as a PhD candidate in 2009. Holding a CISSP certification, his research focus is on information security as well as identity management in inter-organizational environments.

Daniela Pöhn has a university diploma degree in Computer Science from the University of Hagen. She was engaged in the IT industry as a full-time software developer during her studies before she joined LRZ as a PhD candidate in 2012. She is also involved in the identity management joint research activity (JRA3) in GN3plus.
